Risk level

The presented risk index is based on the Key Information Document. It is a general risk index showing the level of risk assumed by a unit holder when investing in this product. The index may help assess the risk levels of a sub-fund as compared to investing in other products. The risk index consists of two parameters: market risk and credit risk. The index value may change. Even the lowest risk category does not mean that a given sub-fund is risk-free. The index does not include, among others: liquidity risk, currency risk, business partner risk, operational risk, sustainability risk or financial technique risk. A detailed description of risks associated with investing in a given sub-fund may be found in the Prospectus available on www.generali-investments.pl
