The sub-fund management takes into account issues relating to sustainable growth in terms of environment, society and governance.

Investment funds managed by Generali Investments TFI meet the Best Disclosure Practice of the Chamber of Funds and Assets Managements and Analyz Online.

About the Sub-fund

- A flexible portfolio based on four groups of debt instruments - domestic T-bonds, domestic corporate bonds as well as foreign T-bonds and corporate bonds.
- Investments mainly in Poland and in the Central and Eastern Europe region.
- Lower sensitivity to interest rate changes due to the dominant share of bonds in the portfolio whose term to maturity is under 397 days or whose interest rate is fixed for periods not longer than 397 days.
- Striving to hedge against the FX risk.

The sub-fund also has the possibility of investing funds in investment categories other than the ones defined above. A full description of the investment policy is set out in the Fund's articles of association which are available at www.generali-investments.pl, tab: Documents.

On December 19, 2024, the name of the sub-fund changed. Old name of the sub-fund – Generali Korona Dochodowy.

Risk level

The presented risk index is based on the Key Information Document. It is a general risk index showing the level of risk assumed by a unit holder when investing in this product. The index may help assess the risk levels of a sub-fund as compared to investing in other products. The risk index consists of two parameters: market risk and credit risk. The index value may change. Even the lowest risk category does not mean that a given sub-fund is risk-free. The index does not include, among others: liquidity risk, currency risk, business partner risk, operational risk, sustainability risk or financial technique risk. A detailed description of risks associated with investing in a given sub-fund may be found in the Prospectus available on www.generali-investments.pl

Definitions

Modified Duration – this ratio shows the change in the value of the debt part of the fund in reaction to a change in interest rates. The higher the duration, the bigger effect of a change in interest rates on a change in the value of a fund unit i.e. the higher the risk connected with the same.

Standard deviation – this ratio shows how risky the given fund is. The higher the ratio, the more volatile the price of a fund unit. This ratio is used to compare the risk of funds with a similar profile (e.g. equity funds).

Debt instruments' maturity

Under 1 year	0,53%
1-3 years	27,25%
3-5 years	39,44%
over 5 years	32,25%

Sharpe's ratio – this ratio shows the profitability of risk borne by the fund compared to safe investments (e.g. treasury bonds). The higher the Sharpe's ratio, the lower the risk at which the return of the fund is generated compared to safe investments.

YTM – (yield to maturity) – this ratio shows the rate of return that investors obtain when buying a bond at the current market price and holding it in their portfolio until maturity.

By investing in a Subfund, the unitholder purchases units and not the underlying assets invested in by the Subfund. No investment is risk-free. Unitholders need to be ready for a possible decrease in or loss of money invested. The individual return on investment is not the same as the Subfund's investment performance and depends on the value of the unit at the time of its sale and repurchase by the Subfund, as well as on handling fees and taxes applicable to the income earned on the investment. Taxes depend on the client's situation and may change in the future.

The presented returns are historic. Neither the Company nor the investment fund guarantees that investment goals or similar future results will be achieved.

In the case of sub-funds for which a template has been set to assess the effectiveness of investments in participation units, reflecting the behaviour of market variables that best reflect the investment objective and policy of the sub-fund, information on the template current as at the date indicated in the document has been included in its content, while full information on historical changes in the template used to assess the effectiveness of investments in participation units of the sub-fund has been included in the Prospectus.

This sub-fund may invest more than 35% of the asset value in securities issued or guaranteed by the Polish Treasury or the National Bank of Poland.
